

Wheel head Fire valve 10mm / 3/8" (Fuseable)

Anglo Nordic offers a full range of Fire valves, this includes remote acting/sensing Fire valves

General information;

- Item has 3/8" female tappings.
- Supplied with 10mm nuts and olives.
- The automatic shutdown occurs by a meltdown of the safety fusible link in the handwheel.
- The alloy which holds the insert in the handwheel complies to BS799 and melts at 98°C (solid @97°C = Liquid @98°C)
- This valve can also be used as a temporary ON/OFF oil stop when the handwheel is turned manually

Range;

- 1401002 = AN101F 3/8"/10mm Wheel head Fire valve
- 1402000 = AN200F Wheel head fire valve – Spare head

Application and uses;

- The Anglo Nordic range of Fire valves can be used in domestic and commercial applications. For use on heating oil only.
- This is an oil safety valve, but should only be fitted where an OFTEC approved OFS E101 Fire valve is fitted. (UK and Ireland only)
