

# SMARTFAN<sup>®</sup>

**SmartFan is a self-powered, efficient, clean & silent device that greatly improves heat circulation from a solid fuel burning stove.**

- Up to 14% saving on fuel consumption
- No running costs
- No external power source or batteries required
- Heats the living area faster
- Maintenance free
- Promotes efficient fuel consumption
- Safe & silent
- One year guarantee
- Airflow\* up to 220 m<sup>3</sup>/h  
\*Airflow up to 350 m<sup>3</sup>/h also available
- Compact size

# SMARTFAN<sup>®</sup>

The device is powered by a thermoelectric generation module, which uses the hot surface of the stove to generate an electrical current to propel the two fan blades. Instead of rising immediately to the ceiling, the heat is propelled directly into the living space providing a greater fuel efficiency & increased level of comfort.

The hotter the bottom & the colder the top, the more electricity is generated. The unique design incorporates an axial fan on the top section which keeps this part cooler - maximising output & projects hot air into the living space.

Thermoelectric generation module

Extended SmartFan range -

**SmartFan:** Up to 20% saving on fuel consumption. Airflow up to 350 m<sup>3</sup>/h

**SmartFan LT:** Lower temperature applications - gas stoves (60 – 190°C)  
Up to 15% saving on fuel consumption. Airflow up to 230 m<sup>3</sup>/h

**SmartFan Mini LT:** Lower temperature applications - gas stoves (60 – 190°C)  
Up to 11% saving on fuel consumption. Airflow up to 170 m<sup>3</sup>/h
