

EUROACQUE MAGNETIC FILTERS

3/4" fittings

GTS MAGNETIC FILTER

- Multi-attachment magnetic filter featuring a first-rate dirt separator.
- The GTS can be installed vertically and horizontally. Great for fitting under boilers, with a max height of 15cm.
- Features a transparent jar allowing the user effortlessly check the status of the cartridge and the water
- Filter comes equipped d with an engineered exhaust system which allows the draining of solid particles
- Reccommend for use in condensing boilers up to 28kw

HIPPO MAGNETIC SLUDGE REMOVER

- The Hippo is a multi treatment, mini magnetic sludge remover filter.
- The filter is very compact in size meaning it is designed for quick installation in limited spaces
- The filters patented design allows the flow of water to always be inside the filtering cartridge touching the magnetic bar as first treatment step
- Recommended for use in condensing boilers up to 35kw

3/4" fittings 22mm Conversion

3/4" fittings

T4 also available in 22mm

T3 & T4 BY-PASS FILTERS

- A highly efficient dirt separator and magnetic filter.
- Unique patented sludge remover with a 3 function integrated valve and bypass setting incorporating a check valve to carry out maintenance without emptying the boiler.
- Fitted with a thread coupling which allows the filters to be dissembled immediately.
- Durable filter made from stainless steel that effectivley filter even copper and aluminium
- T3 is recommended for use in condensing boilers up to 28kw
- T4 recommended for use in condensing boilers up to 35kw
