

# SUNTEC UNIVERSAL PUMPS

## THE ULTIMATE BURNER PUMP SOLUTION

### OVERVIEW

The Universal Oil Pumps guarantee consistency and accuracy in every application.

With a variety of features and functions, these versatile pumps offer a solution which covers a wide variety of burner pump breakdowns.

### WHY THIS PUMP?

The Suntec AUV pumps are designed to replace the majority of the single stage pumps on the market, including SUNTEC AS 47, AS V 47, AL 35, ALV 35. The Universal Pumps can also replace many Danfoss BFP models.

This may require an additional adaptor kit.

### BENEFITS

- Excellent interchangeability
- Choice of nozzle output connection on either side (right or left)
- They can be used on both a 1 or 2 pipe system
- Incorporating a blocking solenoid valve with inline cut-off function
- Suitable for a number of applications, including light oil, B10 heating oil/biofuel blend (as defined in DIN V 51603-6) and kerosene

### ADDITIONAL

For simplicity, the Universal Pumps are also available in a service kit, containing left hand and right hand pump, adaptor kit and accessories.

This makes it significantly easier for the heating engineer as by carrying only the Universal Pumps, a number of breakdown scenarios are covered.
